

Conserve Energy, Increase Savings

**West Boylston
Municipal Light Plant**

Are you wondering how you can cut down on your electric bill? Americans spend an estimated \$19 billion per year on inactive electronics and devices. Devices that are plugged in but not being used, still utilize energy, increasing your electric bill. Take a look below to learn what the biggest energy-wasting electronics are in your home. Unplugging these electronics when they are not being used can lead to energy conservation and savings on your electric bill.
