

Considering Switching to a Heat Pump Water Heater? You Could Get up to a \$500 Rebate and Save on Your Monthly Electricity Bills!

HELPS
Home Energy Loss
Prevention Services

Is your water heater more than 10 years old? With rebates up to \$500 from the HELPS Program, consider replacing your old water heater now, before it fails, with a modern heat pump water heater. In the process, you can save some green while helping to lower your carbon footprint.

For West Boylston Municipal Light Plant customers, heat pump water heaters:

- produce 11x less CO₂ emissions than oil water heating
- have twice the product warranty
- are 4x less expensive to operate annually

Heat Pump Water Heater (50 gallon tank)

Oil Water Heating (32 gallon tank)

Device Price

\$1,169
