LEARN MORE AT
WWW.NEXTZERO.ORG/WEST-BOYLSTON

Are you interested in upgrading your home heating and cooling system and want to explore clean energy options? Consider purchasing an air source heat pump. West Boylston Municipal Light Plant (WBMLP) customers are eligible for a no-cost air source heat pump assessment.

Schedule a no-cost, no-obligation consultation with an independent heat pump expert to learn how the technology works, understand how heat pumps can reduce your heating costs, and receive guidance on using heat pumps for supplementary or whole-home heating. If a customer decides to purchase a heat pump, they will be guided through every step of the process from choosing a contractor, scheduling a post-installation inspection, and applying for a rebate from WBMLP.

WHAT IS AN AIR SOURCE HEAT PUMP?

- ✓ Provides heating and cooling in one system
- ✓ Takes existing heat and moves it through the home
- ✓ Very efficient heat source
- ✓ Can deliver one-and-a-half to three times more heat energy than the electrical energy it consumes

COST AND ENERGY SAVINGS

Heat pumps are a clean, efficient heating and cooling source. On average, heat pumps produce **3.5x** less greenhouse gas emissions than oil, **3x** less than propane, **2.8x** less than natural gas, and **2.7x** less than baseboard heating. WBMLP customers who use heat pumps can save an average of **\$540 to \$3,100** annually on their heating bills over oil, natural gas, propane, and electric baseboard heating. WBMLP customers may also be eligible for a heat pump rebate of **\$250-\$500!**
